Documentation Service

W3Partnership will document your integration architecture to provide you with the transparency and visibility necessary to reduce support costs and build for the future.

The Objectives

Overview: To provide an overview of the main systems and processes and how they interact.

Latency and Redundancy: To identify potentially redundant or duplicated elements and/or licenses.

Design Improvements: To recommend any architectural wins or improvements, with particular reference to any future growth plans.

The Approach

Review: W3 Partnership consultants carry out an extensive review on existing operational documentation relevant to the integration architecture and licensing.

Overview: W3 Partnership develops an high level connectivity diagram of the current integration architecture.

Analysis: The findings are reviewed against established best practice gained from comparative reviews of similar installations.

Recommendations: A set of recommendations can be created to support improvements.

Key Issues
- Organic integration infrastructure, not clearly mapped
- inaccurate view of systems requiring support.
- Complex architecture
- Impact on development time, due to architectural complexities

Benefits
- Independently validated documents adhering to best practice
- Clearly documented systems
- Identification of potential cost savings
- Confidence that your infrastructure is future proof before embarking on the next phase of growth

Deliverables
- Graphical representation and description of your current integration architecture
- Identification of potential problem areas
- Prioritised recommendations for improvements.

W3 Partnership uniquely provides solutions and services that help organisations make sense of their digital applications and services, through integrated platforms and patterns. We are in a position to design, develop, host, manage and monitor such platforms.
